

Full Stack IV– Lab 6

- React Hooks

Developer Note:

- Create a new **create-react-app** application for this lab.

Exercise 1 – Hooks

1. Reuse and apply the sample Clock Class Component source code below and create a Class Component in your application.

<https://codepen.io/gaearon/pen/amqdNA?editors=0010>

2. Rewrite the Class component into a new Functional component that uses React hooks `useState` and `useEffect` to recreate the ticking clock.

Hello, world!

It is 5:04:13 PM.
